

ROOFING, CLADDING AND DECKING LINES

ROOFING, CLADDING AND DECKING LINES

Samesor® produces high quality lines for efficient production of trapezoidal and corrugated profiles.

Our rollforming lines for trapezoidal profiles are made of premium quality parts and components offering a long lasting production solution.

The range of lines includes:

- Single Rollforming Lines
- Double Rollforming Lines
- Triple Rollforming Lines
- Quick-Change Cassette Lines

A few examples of those lines are shortly shown in this presentation.

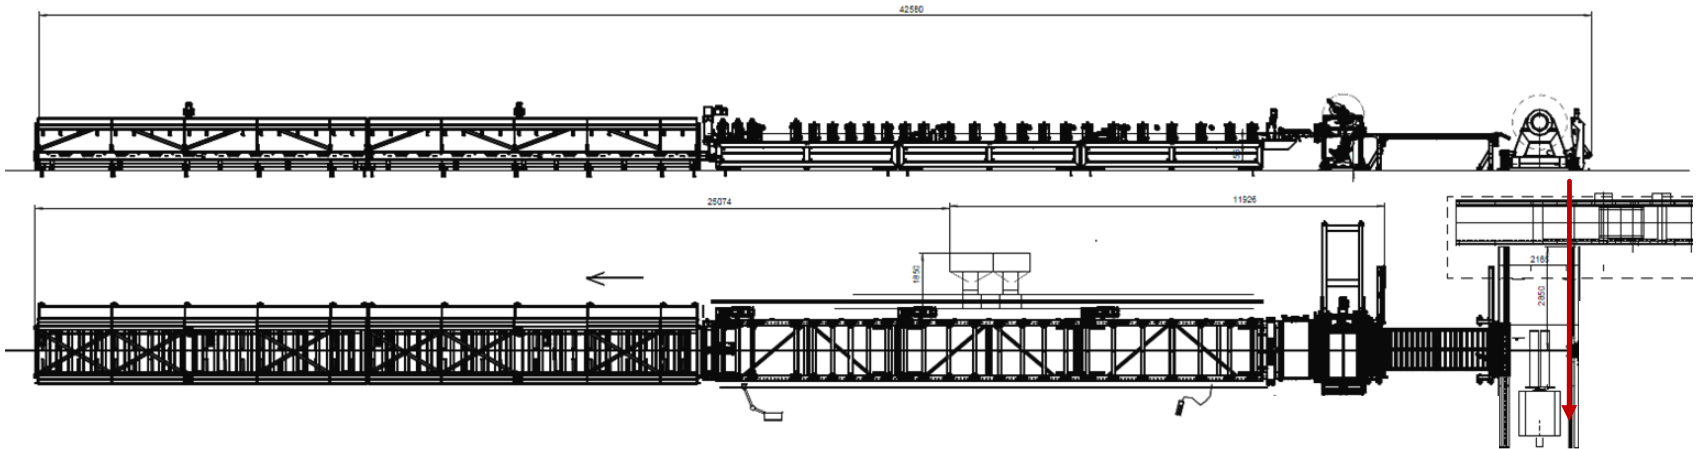

We can also custom-design the line with additional features and functions according to customer needs.

ROOFING, CLADDING AND DECKING LINES

Single Rollforming Line (case in this presentation: PR-32)
